## PROJECT: Guest Room (doubling as Study); Palmetto Bluff

**THE DESIGNER:** Since 2011, Anne Hagerty Interiors has been proud to bring a fresh look at interior design to coastal SC and GA. With our design office in Historic Downtown Savannah, GA and Abode Fine Home Furnishings, a retail showroom in Old Town Bluffton, SC, we are perfectly positioned to cater to the design needs of the Lowcountry region. The firm provides a seamless process from concept phase through installation on every project and we offer a full range of interior design services tailored to each individual project. We are part of Coastal Living and Southern Living's exclusive Designer Network.

**PRO TIP:** Guest Rooms are a great opportunity to have a multi purpose space so you can maximize the usage of the space. A built-in daybed and bookshelves create a cozy nook in this room. Sconce lighting is key to softening the space while providing practical task lighting for reading. We used the same green/gray color as the wall color for the built-ins to create a cohesive room. I love mixing textures – velvet pillows, natural window shades, dark matte sconces, and metallic and organic accessories are what makes the space interesting and dynamic. The homeowners (and their four legged friends) can enjoy this space when they don't have guests.
